INTRODUCTION

Holiday Lights for You and the Holidays

Holiday Lights installation service makes it easy for you to light up your holidays. We take care of the entire process including design, installation, and removal at the end of the season.

WHY WE CARE

Glow and Stow understands the magic of holiday lighting because, as parents, we treasure the joy of celebrating the holidays with our families. Our dedication to creating beautiful, festive displays comes from a deep love for family traditions and making special memories during this magical season.

SEE THE DIFFERENCE

Stow + Glow holiday lighting stands out with premium quality and vibrant designs, shining brighter and lasting longer than standard lights. Our professional installation ensures every display enhances your home's festive charm with superior brilliance.

BULB & WIRE STYLES

We take pride in providing a diverse range of customization options, allowing you to tailor your display to perfectly complement and enhance the unique character of your property.

Bulb Type

Choose a bulb type that resonates with your personal style; every choice is right and adds a special touch to your holiday lighting.

Bulb Colour

Select the perfect bulb color to complement your house's unique style and create a warm, inviting holiday ambiance.

Wire Colour

Select a socket wire color that seamlessly blends with your building, ensuring a custom-fit display that's impeccably tailored, with no loose or sagging wires, for a flawless holiday presentation.

WHY DOES BULB TYPE MATTER?

Bulb type is key to holiday lighting. LED bulbs last longer, use less energy, and offer brighter colors compared to traditional options. Choosing the right bulbs ensures a vibrant, energy-efficient display that enhances the holiday atmosphere and stands the test of time.

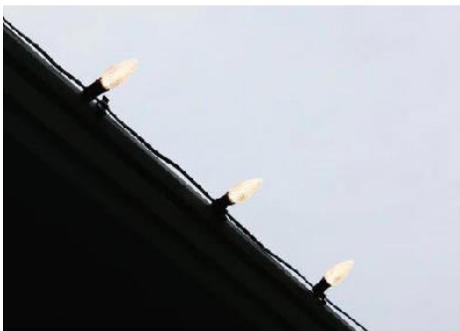

FACETED BULB

These C9 LED bulbs are a direct replacement for traditional C9 incandescent bulbs, delivering a higher level of durability and power and efficiency.

SMOOTH BULB

A great alternative to faceted LED bulbs are these G30 Smooth Bulbs. They use a proprietary magnifying glass-like cone shaped lens to project their light.
